Rockhouse Productions

BOBBY VEE EQUIPMENT RIDER

STAGE & POWER REQUIREMENTS

1. The Vees and/or their road crew require access to the venue 3 to 4 hours prior to the performance for the loading in of equipment, set up and sound check.
2. Stage size should be at least 16' X 24', with an 8' X 8' carpeted drum riser.
3. POWER REQUIREMENTS:
 - A. The Vees require at least 4 separate 30 amp circuits (6 preferred) on the stage.
 - B. If this is an outdoor show, The Vees will only use a generator if purchaser agrees to pay for all expenses resulting from equipment malfunction and/or destruction, including repairs and replacement costs that could occur from generator use. Any and all malfunctions will be considered due to the use of the generator.
4. A set up and tear down crew of at least three people is required to help load equipment in and out of building. They should be available upon the arrival of The Vees and 15 minutes after the performance.
5. In winter, please make sure all snow and ice are removed from the load in area prior to The Vees arrival.
6. See Bobby Vee Contract Rider for catering, hotel and dressing room needs.

I understand and agree to the above terms:
